

2ND INTERNATIONAL EXHIBITION OF ELEVATORS, ESCALATORS AND LIFTING MECHANISMS

THE FUTURE OF VERTICAL TRANSPORTATION TECHNOLOGIES MEETS IN BAKU

Lift Expo Azerbaijan, the region's only specialized elevator exhibition, is preparing to open its doors for the second time. Organized with the support of numerous institutions and organizations, the event will take place at **Baku Expo Center from 31 March to 2 April 2027.**

The exhibition will bring together the latest innovations in vertical transportation technologies, including residential and commercial building elevators, hospital elevators, home elevators and personal lifts, car elevators, freight and service elevators, accessibility elevators, as well as escalators and moving walkways. The event will unite the elevator industry under one roof, providing a comprehensive platform for the latest technologies and solutions in the sector.

Contact Us

Azerbaijan's rapidly developing **construction, real estate, and infrastructure investments**, together with the growing demand for **modernization, energy efficiency, and smart building technologies**, are creating new business opportunities in the elevator and vertical transportation sector.

In line with these strong market dynamics, **Lift Expo Azerbaijan 2027** will be held concurrently with **Azerbaijan AIBMPCE** and **Azerbaijan PVES Expo**, taking place on the same dates.

Bringing all three exhibitions together under one roof creates a comprehensive professional platform that brings together **building materials, prefabricated and modern construction solutions, vertical transportation technologies, solar energy, and energy storage systems**, offering visitors a broad environment for **business development and networking**.

PRODUCT GROUPS

- Complete Elevator Systems
- Machine & Motor Systems
- Control Systems
- Cabins & Frames
- Rails & Accessories
- Installation & Repair Services
- Service, Car & Freight Elevators
- Control & Indicator Products
- Escalators & Moving Walkways
- Lifting Platforms
- Signaling & Electronic Systems
- Landing & Cabin Doors
- Suspension Ropes & Counterbalancing
- Decoration, Signage & Labeling
- Elevator Contracting & Consultancy

BUILDING | LIFT | ENERGY

ONE PLATFORM. THREE POWERFUL SECTORS.

The solutions required by next-generation buildings are addressed from a holistic perspective, spanning building technologies, vertical transportation, renewable energy, and energy storage.

Lift Expo Azerbaijan 2027 offers a strategic meeting point for industry professionals looking to enter the Azerbaijani market, strengthen existing business connections, and reach new markets across the Caucasus, Caspian Region, and Central Asia.

WHY EXHIBIT?

- Access to Azerbaijan's growing building and construction market
- Meet professional buyers from the Caucasus and Caspian Region
- New distributor and business partnership opportunities
- Direct connections with construction companies, real estate professionals, and project developers
- Showcase elevator and escalator technologies to international professionals
- Present solutions for modernization, energy efficiency, and smart buildings
- Reach a wider visitor audience generated by the co-located building and energy exhibitions

Baku's strategic location between **Europe and Asia** makes Lift Expo Azerbaijan not only an important platform for the Azerbaijani market, but also a key business gateway for companies seeking to expand into the **Caucasus, Caspian Region, and Central Asian markets**.

Meet the professionals shaping the future of your industry in Baku, 31 March – 2 April 2027.

Azerbaijan International Building Materials And Prefabricated Construction Exhibition

Azerbaijan
AIBMPCE

Co-Located with Lift Expo Azerbaijan 2027

Azerbaijan's building materials sector is experiencing rapid growth, supported by government policies. Production reached USD 837 million in 2024, doubling its 2020 level with an annual growth rate of nearly 17%.

The President of Azerbaijan declared 2026 the Year of Urban Development and Construction. Under the 2022–2026 Socio-Economic Development Strategy, investments in improving road infrastructure and modernizing public buildings are expected to exceed USD 1.5 billion in 2025 alone.

Imports continue to be a key component of the country's supply chain. As noted by the German-Azerbaijani Chamber of Commerce and Industry, the sector's market potential has yet to be fully realized. Limited local capacity for production equipment and integrated production lines increases dependence on foreign markets and imports.

Due to the limited scale of local light manufacturing, Azerbaijan relies heavily on imported products for high-quality building materials. The relatively high prices of imported alternatives in the local market create a significant market opportunity for international suppliers and exporters.

AIBMPCE 2027 Product Groups

Building Structural Materials - Structural Steel · Cement Products · Precast Components · Construction Aggregates

Decoration And Renovation Materials - Ceramic Wall & Floor Tiles · Sanitary Ware · Natural Stone · Interior & Exterior Coatings

Door, Window And Curtain Wall System - Aluminum Alloy Windows & Doors · uPVC Windows & Doors · Curtain Wall Systems · Architectural Glass Products · Sunrooms

Prefabricated & Modular Buildings - Flooring · Wallpapers · Curtains · Indoor Lighting Fixtures · Smart Lighting Systems

Roofing & Waterproofing Materials - Prefabricated Portable Buildings · Container Buildings · Steel Structure Buildings · Modular Buildings

Pipes and Pipe Fittings - Roofing Tiles · Waterproofing Membranes · Thermal Insulation Materials · Sealing Materials

Interior Decoration & Lighting - Flooring · Wallpapers · Curtains · Indoor Lighting Fixtures · Smart Lighting Systems
